

STABIJACK

The Safest Way to Load Spotted Trailers and Tankers

Eliminate unnecessary trailer accidents at the loading dock with StabilJack! This easy to engage device restrains the strongest part of the trailer eliminating upended and overturned trailers, collapsed landing gear and aggressive pullouts. StabilJack meets (and exceeds) OSHA regulations for chocking and jacking. Once positioned, it ALWAYS works!

Spotter-Truck Positioned System

- Easy to use
- Positioned by spotter truck
- Universally acceptable for all trailers
- Requires "no boots on the ground"
- Enhanced Verification to verify StabilJack is in use
- Not required for every dock
- Three versions from modular platform (can upgrade from SL-1 to SL-3)
- Transportable (if building lease expires)
- Can lease as mobile equipment
- Uses standard on-board power and pneumatic systems
- Lives underneath trailers-no storage
- Not dependent on wall construction
- Not affected by declined or inclined docks
- Not affected by pooling water
- Environmentally friendly
- High visibility yellow color
- Meets or exceeds OSHA
